## Total other hay production

Legend: More than 5,000 thousand tons, 2,000 to 5,000 thousand tons, 1,000 to 2,000 thousand tons, 500 to 1,000 thousand tons, 0 to 500 thousand tons

## Total corn silage production

Legend: More than 10,000 thousand tons, 5,000 to 10,000 thousand tons, 1,000 to 5,000 thousand tons, 500 to 1,000 thousand tons, 0 to 500 thousand tons

## Total greenchop production

Legend: More than 4,000 thousand tons, 1,000 to 4,000 thousand tons, 500 to 1,000 thousand tons, 1 to 500 thousand tons, 0 tons

# 2025 U.S. dairy statistics

## Annual milk production rises amid industry consolidation

Progressive Dairy Editor Audrey Schmitz

Increased processing capacity and growing milk production weighed heavily on milk prices in 2025. What began as healthy margins deteriorated with time as the year ended with milk prices last seen in August 2023. Total milk production, milk output per cow and average cow numbers were up from a year earlier. Despite increased dairy cows and individual herd sizes, prices for replacements set new record highs. Attrition and consolidation remained a long-term trend among U.S. dairy farms licensed to sell milk.

New for 2025, USDA milk production data excluded 15 smaller states to protect the confidentiality of individual operations, reducing the number of available states for data and rankings from 48 to 33.

Carolina fell to 27, Kentucky to 30 and Missouri to 31.

### Licensed herds

In another year of attrition and consolidation, the annual average number of dairy farms commercially licensed to sell milk fell to 23,609, a decline of 1,202 (about 5%) from the year before and down about 19,925 (45%) since 2015.

On a percentage basis, year-over-year declines were fairly steady across the U.S., but 94% of the decline in herd numbers occurred in the Midwest and East regions. Wisconsin remains the nation's leader in the number of herds, at 5,375, but declined by 145 in 2025, followed by Pennsylvania with 4,360 herds, down 320. Herd numbers were also down 120 in New York and 85 in Minnesota.

### U.S. milk production

U.S. milk production rose to 231.658 billion pounds in 2025, up 24 million pounds from 2024. Annual milk production had exceeded year-earlier totals for most of the past quarter-century, down only in 2001, 2009, 2023 and 2024.

Twenty-three states registered annual milk production increases during 2025, led by Idaho and Texas. Offsetting those gains, 10 states yielded production declines compared with 2024, led by Washington and New Mexico.

### State ranking

Based on annual milk production, there were several minor changes in major dairy state rankings compared to 2024. Idaho moved ahead of Texas at 3-4. Iowa and New Mexico moved ahead to 9 and 10, respectively, while Washington fell two positions to 11. Kansas moved ahead of Florida at 21-22. Nevada and Oklahoma rose to 26 and 28 respectively, while North

## U.S. dairy industry 15-year overview

Year	Total Milk production (in millions of lbs)	Number of cows (in thousands)	Milk per cow (lbs per year)	Licensed dairy herds	Average herd size
2011	196,164	9,194	21,336	51,291	179

**THE PROGRAM THAT PAYS OFF**

You count on solutions that will show you a return — in dollars, in performance and through the overall health of your herd.

Feeding Animate® nutritional specialty product in your fully acidogenic diet program supports optimal calcium metabolism, which helps lead to:

- ✓ Lower instances of hypocalcemia<sup>1</sup>
- ✓ Increased postpartum dry matter intake<sup>1</sup>
- ✓ Increased milk yield<sup>2</sup>
- ✓ Improved reproductive performance<sup>2</sup>

**Animate**  
FEED THE STRATEGY THAT DOES MORE®  
PAHC.com/Animate

**Phibro**  
AN ANIMATE WE TRUST

**INTRODUCING NEXT GENERATION MILKING**

SecureCattle® is a maternal bovine appeasing substance (mBAS) which has been proven to alleviate stress so your cattle can have better immune function, improved overall health and well-being, and optimized performance. Delivered through one convenient 5 mL dose applied to a single location on the top of the neck.

**Pour on. Stress gone.**

Scan the QR code or visit [SecureCattleUS.com](https://SecureCattleUS.com) to learn more

**SecureCattle®**

**YOUR COWS OUR PRIORITY**

Your leader in Bypass Fats and Specialty Ingredients Since 1972

- ✓ INCREASED ENERGY FOR HIGH-YIELDING COWS
- ✓ ENHANCE MILK PRODUCTION AND FEED EFFICIENCY
- ✓ SUPPORT BODY CONDITION AND REPRODUCTIVE HEALTH

**UNITED ANIMAL HEALTH**

**GOT PATHOGENS? WE'VE GOT ANSWERS.**

COMBATING COINFECTIONS REQUIRES A MULTI-PRONGED APPROACH

Pathkinex surveillance by United Animal Health reveals that 58% of cows with clinical symptoms carry multiple pathogens. These coinfections heighten disease risk and severity, especially under stress, leading to health and production losses.

Source: May 2025 Federal Milk Marketing Data, USDA  
Note: This data represents only one month of federally marketed milk production. It may not accurately reflect a county's annual milk production and does not account for milk deposited due to price.  
Estimated May 2025 milk production for Idaho counties.
